

POLYTOP

Exporter from china

PTENC180i / 230i / 265i CNC Lathe

Features:

- which is popular among Europe and America, and a new type CNC lathe with education function well.
- Unitary lathe base, sealing protection;
- Imported spindle bearing, with high precision, which have been exported to industrialized country for quantity.
- Most of the time it can finish the turning of the work-piece in high speed by NCD teaching programming, and also can switch to standard NC teaching programming easily.
- This lathe is specially suitable for wide range and small order working occasion, and also for the easy training of operating crew.

Specifications	PTENC-180i		PTENC-230i	PTENC-265i
Max. swing dia. of work-piece	μ360		μ460	μ530
Max. turning dia. of work-piece	μ360		μ370	μ370
Max. turning length of work-piece	570,1000		860,1000,1500	860,1000,1500
spindle speed range	Manual 2 steps:	L:35-480 rpm H: 215-3000rpm	L: 2 steps 9-80+25-250	
	Gearless:	200-3000 rpm	H: 2 steps 76-760+230-2000	
spindle motor power	standard / optional: 4.0 / 5.5 kw		7.5 kw	11.0
Dia. of spindle bore	Manual 2 steps:	μ40 mm	μ80	μ80
	Gearless:	μ52 mm		
Optional Comtzol	FAGOR 8055TC / SIEMENS 802CE			
tool post	4-tool electric turret; gang tool post
