## PTQH11-SERIES SHEARING MACHINES:

### Functions and Characteristics:

The machine is easy in structure and adopts clutch structure of resistance key form and opened gear-box diving. It has lowest noise and is convenient to operate and maintain. Special mechanical plate pressed system has greater plate pressing power. And it ensures the shearing precision.

This machine is suitable to be used in the industry of mine, automobile, ship, boiler and metallurgy to shear plates or to finish crude edges of the plate materials.
