PTF2-2MS Functions of digital readout (a universal model for super-class milling machines)

- Metric system/British system conversion
- Function calculator
- Absolute/relative conversion
- Progressive processing and calculation of internal cavity of rectangle
- Mid-splitting function
- Cutting tool diameter compensation
- Easy "R" function
- Inclined plane processing
- Rounding "R" function
- Zero position automatic digital follow-up
- PCD hole positioning on circumference
- Linearity error compensation function
- 200 groups zero position memory
- Power down memory
- Inclined line punching
