PTF8-3B Functions of digital readout

- Metric system/British system conversion
- PCD hole positioning on circumference
- Absolute/relative conversion
- 200 groups zero position memory
- Mid-splitting function
- Function calculator
- Linearity error compensation function
- Progressive processing and calculation of internal cavity of rectangle
- Positive/Negative direction counting
- Cutting tool diameter compensation
- Reset Inclined plane processing
- Collision edge measurement (additional)
- Online communication function (additional)
- Rounding "R" function RS-232-C interface (additional)
- Zero position automatic digital follow-up
- Power down memory
- Inclined line punching
